

RH Transmitter Upgrade

Leaking buckets. Mineralized socks. Constant water use...are you tired of Wet Bulb reservoirs yet?

PCSI offers an RH Transmitter upgrade package for their kiln controllers: If you decide after purchase that you are tired of dealing with your Wet Bulb reservoir, you can purchase the RH Transmitter upgrade (which consists of one RH Transmitter and one DC supply).

Upgrading the controller consists of adding approximately six wires and a slightly configuration change to the Wet Bulb controller. The existing Wet Bulb sensor cable can typically be reused!.

Pictured below, RH Transmitter w/ optional Teflon filter.
